DETAILED ACTION

1. Election/Restriction

A. Applicants were sent a restriction plus an election of species on 12/14/00 (Paper No. 5). In the response of 3/20/01, Applicants elected Group 1, claims 1-17. However, Applicants were also required to elect a species of chimeric peptide in which they were to elect one nociceptive receptor binding moiety (one of SEQ ID NO:21-41) and one opioid (either mu, kappa, or delta) receptor binding moiety (SEQ ID NO:1-20 and 44). Applicants elected the chimeric peptide comprising a mu opioid receptor binding moiety, but failed to elect a nociceptive receptor binding moiety and mu opioid receptor binding moiety as required by the election of species. However, in light of the fact that each of these SEQ ID NOs is independent, and, therefore, patentably distinct, and one is not deemed obvious over the other, the species election has been withdrawn and restriction to one of the following inventions is required under 35 U.S.C. 121:

Claims 1-17 recite 21 distinct nociceptive receptor binding moieties of SEQ ID NO:21-41 and 11 mu opioid receptor binding moieties (SEQ ID NO:1-11). Therefore, the total combination of chimeric peptides which can be made using one nociceptive receptor binding moiety and one mu opioid receptor binding moiety, is 231 (11x21).

These 231 inventions are distinct, each from each other because Inventions 1-231 are independent and are products which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged.

Therefore, Applicants are required to elect one nociceptive receptor binding moiety of SEQ ID NO:21-41 and one mu opioid receptor binding moiety of SEQ ID NO:1-11.

Art Unit: 1647

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

B. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
